

New investments in the Dairy sector

For several years dairy has been considered a stable sector, nevertheless, against the trend of other European producers, ILPA-MP3 has invested over 2.5 millions of euros in 2009 with the objective of improving production quality of the latest generation of finished film FFS (form-fill-seal).

Within the first few months of 2010 a new production line will become operative capable of guaranteeing quality performance of extremely high levels. The objective of MP3 is to consolidate their market position to become among the top-five European producers in the sector.
