New Range of BIOPOLYMERS

ilpa produces films from BIOPOLYMERS since 2004 and it is leader in the production of PLA FILM. **MW** has been the first company in Europe producing PLA film for the FFS dairy sector.

At K2019 together with PLA we are presenting two new product proposals to be developed with our customer from all over the world.

A Complete RANGE OF REELS

REELS IN PS AND PP COMPLETE OUR WIDE RANGE OF REELS FOR THE THERMOFORMING SECTOR.

Since 1984 we have been producing PS reels for the food sector, in particular the dairy sector where we are one of the leader in Europe.

Over 20,000 tons of PP film with 20 years of experience using all PP grades: Homo; Copo; Random.

THE AESTHETICAL RANGE OF OUR SHEETS.

Acquired to increase the production capacity with the latest and top-level technical equipment for producing high aesthetical and technical quality ABS/PMMA sheets

2020 NEW ABS/ PMMA LINE

Established in Italy in 1978, MP3 has concentrated its growth in the strategic sectors of the industrial markets; in many of which is today among the European market leaders (eg. automotive, sanitary, caravan, household-appliances and food sectors). Our plants are among the most modern in the industry and are the result of ongoing technological research, backed up by the most advanced electronic systems for the management and control of the production.

With the new **45000 sqm** facility located on an area of **80000 sqm**, the company's production capacity currently exceeds **78000 ton/year** with plenty of room for further growth. **Over 72% of the production is now exported**. Stringent quality controls are made in every stage of the process, from incoming raw materials to the delivery to customers. In many cases, the materials for special applications are developed in conjunction with the customer itself to better meet the market requirements.
